Varmepumpe

Ved hjælp af varmepumpeteknologi reduceres energiforbruget uden at gå på kompromis med tørreresultatet.

Hygienisk tørring og Hygienisk opfriskning

Hygiejneprogrammet holder en temperatur over 56 grader i 75 min, og hygiejne opfrisknings-programmet opfrisker 1,5 kg. tørt tøj på blot 100 min. ved at holde temperaturen over 60 grader i min. 45 minutter.

Udendørs tøj/sportstøj Program

Programmets tørrecyklus skaber mindre friktion mellem tromlen og tekstilerne og fordobler dermed levetiden på vandafvisende og svedtransporterende membraner.
